PERSON PROFILE

Full stack developer with four years of complete professional work experience in building modern applications and business solutions. Seeking to secure a role as a full stack developer or engineer at your esteemed company where I can prove my skills in designing, coding, and testing.

EMPLOYMENT HISTORY

Full Stack Engineer at Ali Bin Abdulaziz Investments Co, Dubai, UAE.

February 2022 — Present

- Experience developing REST and Web applications on modern MVC PHP frameworks such as Laravel.
- Working experience with Amazon EC2, Github and Bitbucket.
- Worked in all aspects of WordPress website creation supporting multilingual languages, including design, plug-ins, implementation and SEO.
- Manage a user guide to help and provide technical support to clients understand site features and management of website to increase visitor satisfaction.

Software Engineer at Imara Software Solutions, Puttalam, Sri Lanka.

June 2020 — November 2021

- Built modern applications using PHP, Laravel, WordPress, and MySQL and supported the company's development and testing processes.
- Maintained repositories for each project using Git.
- Worked with software from a variety of industries, including consumer software, office solutions, healthcare databases, and business solutions.
- Wrote maintainable and extensible code in a team environment.

Trainee Software Engineer at Imara Software Solutions, Puttalam, Sri Lanka.

November 2019 — June 2020

- Revolve around working to help create websites and web applications using PHP.
- Writing independent piece of codes for ongoing development needs.
- Working as part of a team of developers and report to a Senior Software Engineer.
- Making responsive web pages using HTML5, CSS, Bootstrap, JavaScript and jQuery.

EDUCATION
